

Addendum #1 – 2016 Concrete Replacement Project

1. Will the contractor be responsible for CDOT Permit along Hwy 50?

The concrete work required is along the ROW of Hwy 50 and will not require a permit. CDOT will require a certified traffic control company to do any lane closures and require the submittal of the traffic control plan to the City prior to work commencement.

2. Will the traffic control plans be required with Bid Submittal?

The traffic control plans will be due with the signed Contract after the Notice of Award.
